## PROFESSIONAL EXPERIENCE

---

### Union Adventist University - Information Systems

Student Programmer

Lincoln, NE

May 2025 – Present

- Developed a console program that automatically gathers financial data from multiple sources and uploads it into a SQL database on a scheduled monthly cycle, eliminating manual entry and improving accuracy and efficiency.
- Built an internal Summer Workshop Program allowing users to input information about their workshops.
- Implemented a student-type simulation tool on the registration portal that allows authorized staff to safely modify key student attributes such as graduation term, undergrad/grad status, international status, curriculum, and birth date and automatically updates the test database and portal to verify how student-specific information is displayed without manual database edits.

### Union Adventist University - Information Systems

Student Assistant

Lincoln, NE

October 2023 – August 2024

- Configured and deployed 50+ computers onto the university's domain, ensuring full compliance with IT protocols and security standards.
- Managed over 100 computers and IT equipment, resulting in a decrease in support tickets by 10%.
- Provided technical troubleshooting for 60+ users across multiple departments.

## PROJECTS & OUTSIDE EXPERIENCE

---

### StatScout

JavaScript, HTML/CSS, React Native

Lincoln, NE

November 2024

- Built a sports app that tracks live game scores by integrating multiple web APIs to deliver real-time updates.

### Isle of Shadows

Python

Lincoln, NE

November 2023

- Collaborated with classmates to build a text based video game using Object oriented programming principles.

## ACTIVITIES & LEADERSHIP

---

### Senator

International Representative
